

AWS Machine Learning Cheat Sheet

Core ML Platform

- SageMaker → build, train, deploy ML models

Prebuilt AI Services

- Rekognition → image/video analysis
- Comprehend → text/NLP
- Polly → text to speech
- Transcribe → speech to text
- Translate → language translation
- Lex → chatbot

When to Use What

- Use AI services when no ML expertise
- Use SageMaker for custom models

ML Concepts

- Supervised → labeled data
- Unsupervised → pattern finding
- Reinforcement → reward-based learning

Common Use Cases

- Chatbots → Lex + Polly
- Subtitles → Transcribe + Translate
- Image detection → Rekognition

Exam Tips

- Speech vs Text vs Translate differences
- NLP vs Image services
- SageMaker = custom ML
- AI services = ready-made solutions
