

AWS Security & Compliance Cheat Sheet

IAM (Identity & Access Management)

- Users, Groups, Roles, Policies
- Follow Least Privilege principle
- MFA adds extra security

Core Security Services

- GuardDuty → threat detection
- Inspector → vulnerability scanning
- Macie → PII detection in S3
- Shield → DDoS protection
- WAF → protect from SQL injection/XSS

Encryption

- KMS manages encryption keys
- Data at rest & in transit encryption
- Used with S3, EBS, RDS

Monitoring & Logging

- CloudTrail → API logging
- CloudWatch → metrics & logs
- Config → resource compliance tracking

Compliance

- AWS Artifact → compliance reports
- Shared Responsibility Model
- AWS secures cloud, you secure data

Exam Tips

- GuardDuty vs Inspector vs Macie
- Shield vs WAF
- CloudTrail vs CloudWatch
- Roles = temporary access
